Aligned security architecture design with regulatory requirements and presented risk mitigation strategies to project stakeholders.

Systems Security Administrator – Windows Server Access Control

Implemented Active Directory security controls using OUs, Group Policies, and RBAC aligned with NIST AC-5/AC-6 least-privilege principles.

Configured NTFS permissions, departmental access controls, password policies, and account lockout settings.

Maintained access control documentation and validated permission enforcement across multiple user roles.

Kali Linux Network Reconnaissance & Security Testing

Configured a Kali Linux VM, established network connectivity, and manually configured DNS settings via the terminal.

Performed terminal-based reconnaissance and network/service analysis using Nmap, Nikto, and Amass, identifying open ports,T /F1 8.5 Tf 10.2 T
