

RAKTABH DUTTA

SOC Analyst | SIEM Monitoring | Incident Triage & Security Analysis

+91 8796746629 • dutta.raktabh@gmail.com • New Delhi (Open to Relocation/Remote) • linkedin.com/in/raktabhdutta

PROFESSIONAL SUMMARY

Cybersecurity professional with a Master of Cybersecurity and 3 years of enterprise IT support experience across NBN, Energy Australia, WSP and WIPRO. Hands-on experience with Splunk Enterprise and SPL for Windows Security and Sysmon telemetry analysis, alert triage, event correlation and incident investigation. Knowledge of NIST CSF, ISO/IEC 27001, MITRE ATT&CK and ServiceNow-based incident management and escalation.

PROFESSIONAL EXPERIENCE

Axiom Technologies | IT Support Technician

Feb 2021 – 2024

Enterprise support for NBN, WIPRO, WSP and Energy Australia

- ▶ Resolved hardware, software, Windows, Microsoft 365, connectivity and user-access issues for enterprise users.
- ▶ Logged, tracked and documented incidents and service requests in ServiceNow, meeting defined SLAs.
- ▶ Performed initial diagnosis and escalated complex issues to specialist/senior teams per defined procedures (L1 → L2/L3).

SECURITY PROJECTS

Splunk SOC Investigation

- ▶ Ingested Windows Security and Sysmon telemetry into Splunk Enterprise; built SPL searches for successful/failed logons (4624/4625) and repeated authentication failures.
- ▶ Developed reusable SPL detections for suspicious and encoded PowerShell (4104) and correlated process and network events to reconstruct timelines.
- ▶ Documented findings, evidence and detection logic in a structured SOC investigation report.

SOC L1 Incident Detection & Response

- ▶ Simulated an attack from Kali Linux against Windows 10 in an isolated lab; correlated authentication, PowerShell and Sysmon (Event IDs 1, 3) activity into an incident timeline.
- ▶ Classified the incident, assessed severity and impact, and documented containment and escalation recommendations.

ISO 27001 Risk & Compliance Assessment – Resimac Group (Academic Consulting)

- ▶ Assessed risk across 15+ critical assets using ISO/IEC 27001 and NIST RMF; built risk registers and treatment plans.
- ▶ Performed control gap analysis and recommended MFA, SIEM, DLP, VPN hardening and network segmentation.

EDUCATION

Master of Cybersecurity and Management | Australian Institute of Higher Education

2026

Bachelor of IT & Computer Systems | Victoria University

2019

TECHNICAL SKILLS

Security Operations: SIEM Monitoring, Alert Triage, Log Correlation, Incident Investigation & Response, Escalation

Tools: Splunk Enterprise (SPL), Sysmon, Nmap, Nessus, Burp Suite, OWASP ZAP, FTK Imager

Endpoint & Logs: Windows Security Event Logs (4624/4625/4688/4104), PowerShell Logging, Process & Network Telemetry

Frameworks: MITRE ATT&CK, NIST CSF, NIST RMF, ISO/IEC 27001, ASD Essential Eight

Systems & ITSM: TCP/IP, Firewalls, VPN, DNS, Active Directory, Windows 10/11, Linux (Kali), ServiceNow, Microsoft 365
